

2004

Service Nova Scotia
and Municipal Relations
Vital Statistics

The Honourable Myra Freeman
Lieutenant Governor
Province of Nova Scotia

Your Honour :

I have the pleasure of presenting the Report
of the Registrar General containing the Vital
Statistics of the Province for the year ending
December 31, 2004.

A handwritten signature in dark ink, appearing to read 'Richard Hurlburt', with a stylized flourish at the end.

Richard Hurlburt
Registrar General

To The Honourable Richard Hurlburt
Registrar General
Province of Nova Scotia

Sir :

It is my privilege to present to you the
Report of the Deputy Registrar General
containing the Vital Statistics of the
Province for the year ending December 31,
2004.

A handwritten signature in cursive script, reading "Elizabeth Crowley Meagher".

Elizabeth Crowley Meagher
Deputy Registrar General

PART I

INTRODUCTION AND HIGHLIGHTS OF STATISTICS

Introduction

The 2004 Annual Report of births, deaths, stillbirths, and marriages is compiled by the Vital Statistics Unit of Service Nova Scotia and Municipal Relations. Data on vital events occurring in Nova Scotia have been published since 1917. The information presented in the following 32 charts and tables is based upon data collected on vital event registrations.

The Vital Statistics Act (*Chapter 494 of the Revised Statutes of Nova Scotia, 1989*), requires that all births, deaths, stillbirths, and marriages in the province be registered with the Vital Statistics Office. The Solemnization of Marriage Act and the Change of Name Act are also administered by Vital Statistics.

The provincial registration system serves two primary functions:

1. to obtain and preserve the documentary evidence necessary to provide individuals with official proof of the facts concerning a birth, death, stillbirth, or marriage; and
2. to provide information and statistics to health professionals and planners for public health surveillance, health education and promotion, epidemiological research, and health planning.

Vital Event Data

This report summarizes information on vital events that occurred in the province for Nova Scotia residents. It excludes events to non-residents except where specifically noted. Statistics relating to Nova Scotia residents who gave birth, were married or died outside the province are also excluded. Marriage statistics summarize all events that occurred in the province to either residents or non-residents.

To maintain confidentiality, identifying information for individuals is not disclosed.

At the national level, Nova Scotia Vital Statistics, along with all other Canadian provinces and territories, shares data with Statistics Canada for further compilation, analysis, reporting and comparison. Information on vital events that occur to Canadians outside their province of usual residence is made available through their publications.

Time Periods

This report covers events occurring in the calendar year 2004. Selected tables present aggregate data across a number of years.

Population Data

Population estimates were provided by Statistics Canada. Vital Statistics has used the 2001 Census population.

Medical Coding

Medical Certificates of Death and Stillbirth provide information on the immediate cause of death or stillbirth, antecedent causes giving rise to the immediate cause, and other significant conditions contributing to the death or stillbirth. The World Health Organization's International Classification of Diseases (ICD) coding scheme is used to assign the appropriate medical codes. This information is processed by Statistics Canada in Ottawa, using microfilmed images of Registrations.

Since the early 1900's, the International Classification of Diseases has been revised regularly in order to reflect advances in medical science and changes in diagnostic terminology. The ninth revision of ICD (ICD-9) was used for medical coding until 1999. Coding according to the 10th revision of ICD (ICD-10) was implemented nationally as of January 1, 2000.

Acknowledgements

Vital Statistics would like to acknowledge and thank the many groups and individuals who ensure complete and accurate recording of vital events, including our division registrars of births, deaths and stillbirths located in hospitals and funeral homes, deputy issuers of marriage licenses, physicians who certify causes of death and stillbirth and the Provincial Medical Examiner's office at the Department of Justice.

Other Information and Contact Information

More information on the Vital Statistics Unit of Service Nova Scotia and Municipal Relations is available on our website at <http://www.gov.ns.ca/snsmr/vstat/>. Previous years' Annual Reports, back to, and including 1997, may be accessed online.

On a Typical Day in Nova Scotia in 2004

☐ 24 LIVE BIRTHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:

- ▶ 12 males and 12 females
- ▶ 8 babies were born every 7 days to teenage mothers
- ▶ 10 were born to parents not married to each other
- ▶ 2 live births were registered with no father named
- ▶ 4 low birth weight babies were born every 3 days (< 2500 grams)
- ▶ 1 multiple birth occurred every 3 days
- ▶ 1 stillbirth occurred every 5 days

☐ 22 DEATHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:

- ▶ 11 males and 11 females
- ▶ 7 deaths were due to diseases of the circulatory system including:
 - 4 - deaths from heart disease
 - 2 - deaths from cerebrovascular diseases
- ▶ 7 deaths were due to cancer including:
 - 2 - from lung cancer
- ▶ 2 deaths were due to diseases of the respiratory system
- ▶ 6 deaths every 5 days resulted from accident or violence
- ▶ 3 deaths every 4 days were due to diabetes
- ▶ 4 deaths every 7 days were due to Alzheimer's disease
- ▶ 1 death occurred every 46 days due to AIDS/HIV infections
- ▶ 1 infant death occurred every 10 days

☐ 13 MARRIAGES WERE SOLEMNIZED IN NOVA SCOTIA:

- ▶ 4 were civil ceremonies and 9 were performed by religious representatives
- ▶ 8 marriages were to couples where both parties were marrying for the first time
- ▶ 1 marriage every 73 days was to a couple where both parties were teenagers

☐ 1 DOMESTIC PARTNERSHIP DECLARATION WAS FILED EVERY 7 DAYS

Summary of Vital Events

Since 1951, the population of Nova Scotia has increased by approximately 45%. Demographic and social changes have had a dramatic impact on vital events. The birth rate has fallen to less than half the rate seen in the early 1960's, yet the mortality rates have remained more or less static. The net result, in 2004, is a 'natural increase rate' of only 0.5, as the number of deaths approach the number of births each year. Emigration and immigration are not included in natural population growth rates.

- ❑ In 2004, there were 8,638 live births in Nova Scotia to NS residents. The number of live births increased by 102 births from 8,536 births in 2003. The birth rate is 9.2 births per 1,000 population.
- ❑ There were 8,168 deaths of Nova Scotia residents in 2004, up 171 deaths from the previous year. The death rate was 8.7 deaths per 1,000 population. The leading causes of death in Nova Scotia are diseases of the circulatory system and cancer; in 2004, deaths from these causes made up 62.6% of all deaths.
- ❑ A total of 4,609 marriages were solemnized in Nova Scotia in 2004. The marriage rate per 1,000 population has dropped from 5.1 in 2003 to 4.9 in 2004. Marriage statistics include all marriages that took place in the province, including those where one or both parties were non Nova Scotia residents.
- ❑ Same-sex marriage was legalized in Nova Scotia in September of 2004. From the time it was legalized to the end of 2004, there were 25 same-sex marriages solemnized in the province. 5 of these marriages were of male couples, and 20 were of female couples.
- ❑ There were 76 stillbirths to residents of Nova Scotia in 2004. The stillbirth rate was 8.7 per 1,000 total births (live births and stillbirths).
- ❑ In 2004, there were 38 infant deaths (age at death less than one year) in the province, for an infant mortality rate of 4.4 per 1,000 live births. Of these 38 infant deaths, 26 were perinatal deaths, occurring to infants under one month of age. The infant death rate in the past five years has ranged from 3.7 to 5.5.

Summary of Birth Statistics

- ☐ In 2004, there were 8,638 births to residents of Nova Scotia, of which 49.7% were males (4,290) and 50.3% were females (4,348).
- ☐ There were 92 births in Nova Scotia to non-residents of the province.
- ☐ The vast majority of births – 99.7% – occurred in hospital.
- ☐ Halifax and Hants counties experience the highest birth rate per 1,000 population at 10.7 and 9.7 respectively.
- ☐ Guysborough and Cumberland counties experience the lowest birth rate per 1,000 population at 5.9 and 6.17 respectively.
- ☐ The provincial birth rate for 2004 was 9.2 births per 1,000 population. This compares to the Canadian national birthrate of 10.6 for 2003¹, which has increased slightly from the all-time low national birthrate of 10.5 in 2002.
- ☐ Low birth weight is linked to poor infant health and mortality¹. Less than 6% of babies born in Nova Scotia in 2004 had a birth weight under 2500 grams.
- ☐ In 2004, there was 1 birth to women under the age of 15, and 439 births to women aged 15-19, for a total of 440 births to teenage mothers (age 19 and under). This represents 5.1% of all live births for 2004. There were 114 births to teenaged fathers (aged 19 or younger), or 1.3% of live births. Of the 440 births to teenaged mothers, 86 were to fathers who were also 19 years of age or younger. This means <1% of live births in 2004 were to couples who were both teenagers.
- ☐ In 2004, 49.3% of live births were to women aged 20-29, 43.3% of live births were to women aged 30-39, and 2.2% were to women aged 40 or older. The average age of women who gave birth in 2004 was 28.7 years, while for first-time mothers in Nova Scotia, the average age was 27.0 years.
- ☐ There were 125 births to parents who were both 40 years of age or older. This was 1.4% of live births. The oldest mothers were 46 years of age and the oldest fathers were over 65.
- ☐ Of all live births in 2004, 706 or 8.1% were to fathers aged 40 or older.

¹ Statistics Canada [2005]. *Births 2003*, Catalogue no. 84F0210XIE.

ANOTHER WAY TO PRESENT THIS INFORMATION

Of every 100 live births in Nova Scotia in 2004, approximately

- ☐ 5 were to teenaged mothers aged 19 or under (440);
- ☐ 49 were to mothers aged 20-29 (4,260)
- ☐ 43 were to mothers aged 30-39 (3,744)
- ☐ 2 were to mothers aged 40-49 (192)
- ☐ 1 was to a teenaged father aged 19 or under (114)
- ☐ 33 were to fathers aged 20-29 (2,840)
- ☐ 47 were to fathers aged 30-39 (4,104)
- ☐ 9 were to fathers aged 40-49 (750)
- ☐ < 1 was to fathers aged 50-59 (51)
- ☐ <1 was to fathers aged 60 and over (5)
- ☐ 9 were to fathers whose age was not stated (774)

Summary of Death Statistics

- ☐ In 2004, there were 8,168 deaths to residents of Nova Scotia, of which 49.9% were males (4,072) and 50.1% were females (4,096).
- ☐ Queens and Annapolis counties experience the highest death rate per 1,000 population at 13.5 and 13.2 respectively.
- ☐ Halifax and Antigonish counties experience the lowest death rate per 1,000 population at 6.8 and 7.88 respectively.
- ☐ The provincial death rate for 2004 was 8.7 deaths per 1,000 population.
- ☐ There were 2,688 deaths due to disease of the circulatory system in Nova Scotia, which is 32.9% of all deaths. Of these:
 - ☐ 708 were due to chronic ischemic heart disease – 8.7% of all deaths
 - ☐ 608 were due to acute myocardial infarction (heart attack) – 7.4% of all deaths
 - ☐ 587 were due to cerebrovascular disease, including stroke – 7.2% of all deaths
- ☐ There were 2,423 deaths due to malignant neoplasms (cancer) in Nova Scotia, 29.7% of all deaths.
- ☐ There were 450 deaths due to chronic lung diseases, (excluding asthma), 5.5% of all deaths.
- ☐ There were 340 deaths due to disease of the digestive system, including liver disease – 4.2% of all deaths.
- ☐ There were 131 deaths due to accidents and unintentional injury – 1.6% of all deaths.
- ☐ There were 257 deaths due to diabetes - 3.1% of all deaths.
- ☐ There were 203 deaths due to influenza (14) and pneumonia (189) – 2.5% of all deaths.
- ☐ There were 89 deaths due to intentional self-harm (suicide).

Summary of Stillbirth, Maternal Death and Infant Death Statistics

- ☐ Stillbirths are defined by delivery of a fetus that is 500+ grams in weight or 20+ weeks in gestation and where there is no breathing, beating of the heart, pulsation of the umbilical cord or unmistakable movement of voluntary muscle.
- ☐ In 2004, there were 76 stillbirths to mothers who were residents of Nova Scotia, which is a rate of 8.8 per 1,000 live births.
- ☐ The Canadian national rate for stillbirths in 2003 (the last reported year) was 6.6 per 1,000 live births.¹
- ☐ The stillbirth rate in Nova Scotia has dropped dramatically since the early 1940's, when the rate was 25.5 stillbirths per 1,000 live births.
- ☐ In 2004, there were 38 infant deaths (death occurring to a child under 1 year of age) in the province, for an infant mortality rate of 4.4 per 1,000 live births. Of these 38 infant deaths, 26 were perinatal deaths, occurring to infants under one month of age. The infant death rate in the past five years has ranged from 3.7 to 5.5.
- ☐ The Canadian national infant death rate for 2003 (the last reported year) was 5.3 per 1,000 live births.² Nova Scotia has been consistently at or below the national infant death rate.
- ☐ Nationally, Sudden Infant Death Syndrome (SIDS) is the leading cause of death of infants between the ages of 28 days and 1 year.³ In 2004, there were only 2 cases of SIDS in Nova Scotia. The leading category of causes of infant death in the province is Certain Conditions Originating in the Perinatal Period, which includes conditions which have their origin in the perinatal period (before and during labour) even though death (or morbidity) occurs later.⁴ There were 19 deaths in this category. For specific causes of death in this category, please see Table VII.
- ☐ There were 8 infant deaths attributable to congenital malformations, deformations, or chromosomal abnormalities.
